

Source model
(Lagrange eq. (1)-(2))

Parameter identification
(4 unreported parameters)

Python / Radau implementation

Reproduction of SRC-A
Table 1 and stage-1 integrals

3^3 full-factorial design (27 runs)

Rigid and compliant runs
start-off + braking

Second-order response surfaces
(10 coefficients, 17 d.o.f.)

ANOVA, curvature and
interaction assessment

Uncertainty propagation
(Monte Carlo)

Physical-test protocol
(81-run scaled rig)
